SMART SHOWER

Temperature and shower duration display

In built sensor for flow change

Rainfall

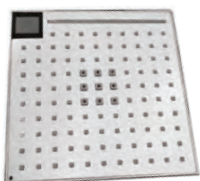

Power Mist

Waterfall

With water-powered temperature-sensing component, it displays water temperature intuitively. Also, it counts how long you have taken shower and reminds you to save water usage. After turn off the shower, if the bather turns it on again within 3 minutes, then the time will be keep counted. What's more, the digits will be displayed in three colors(RGB) to show different water temperature range.

## SAUNA CABIN (Fixed Size)

The sauna cabin is fabricated from pine wood (Finland), It is doubled walled and in between the walls glass wool is packed in order to insulate the sauna room and avoid any heat loss (applicable to double paneling ) thick wall and ceiling panels providing greater insulation and structural integrity. Interlocking. Discrete nailing to improve visual appearance integrated with ducted air vent to ensure comfort for users. Sauna benches fabricated from extra thick slat with sauna generators containing lava stone to heat the cabin. It is provided with a wooden bench, ventilator, glass door and light.
