ADVANTAGES

High Tech Cartridges to ensure smooth & precise handle movement

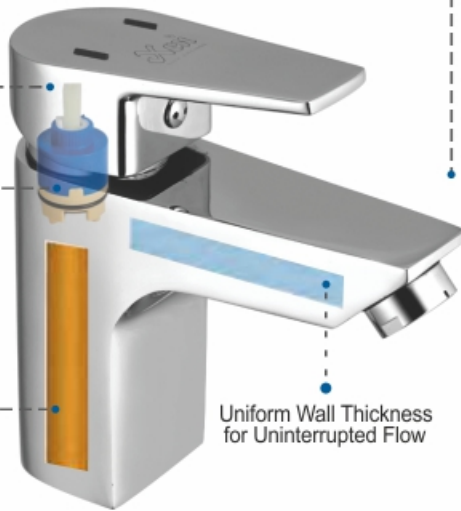

Chrome-plated finish on all faucets for a long-lasting dazzle.

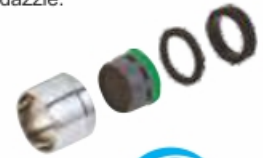

Long Life Cartridges Tested For 200000 Cycles

Faucets created from high quality brass to ensure safety of health

Uniform Wall Thickness for Uninterrupted Flow

Aerated flow technology that makes the water feel smooth and more soothing

Aerators available in 1.4, 2.4, 4, 6, 8, 13 LPM to suite Green Building Requirement

Chrome 0.2 - 0.3 μ

Nickel 10 -12 μ

Brass

Dear Xen Family Partners, Warm Greeting! As I reflect on our journey at Flora Steels Pvt. Ltd., I am filled with immense pride and gratitude for the trust and support you have bestowed upon us over the past three decades. Our story is not just one of growth and success; it is a testament to the enduring values that define us as an organization.

At the heart of everything we do lies a profound commitment to quality. It's not just about creating products; it's about crafting experiences that delight and inspire. From the inception of an idea to the final product in your hands, we leave no stone unturned in our quest for perfection. Each faucet, and each accessory, bears the mark of our dedication to excellence—a commitment that resonates in every corner of our organization.

But quality, I've come to realize, is not just about what we make; it's about how we make it. That's why we are staunch advocates of being a process-driven organization. We believe that consistency breeds trust, and trust is the foundation of enduring relationships. By meticulously honing our processes, we ensure that every product that bears the Xen Bath Fittings emblem is a testament to our unwavering commitment to excellence.

And yet, amidst the pursuit of perfection, we never lose sight of what truly matters—our customers. For us, customer-centricity is not just a buzzword; it's a way of life. We believe in listening, in understanding, and in going above and beyond to exceed your expectations. Because at the end of the day, our success is measured not in sales figures or market share, but in the smiles on your faces and the satisfaction in your hearts.

As we stand on the threshold of tomorrow, I am filled with a sense of optimism and anticipation. Together, let us continue to write the next chapter of our story—one defined by passion, integrity, and an unwavering commitment to excellence.

Thank you, from the bottom of my heart, for being an integral part of our journey.

Warm regards,
AJIT GARG
Managing Director
Flora Steels Pvt. Ltd.

Teamwork is a sense of unity and the Xen family is a firm believer in that. When we work together towards a goal, it becomes much more achievable. Xen team leaves no stones unturned to guarantee the best possible life span and superior quality products. Our products are unique, easy to install and come with a warranty of up to 10 years.

With this aim, our team is working together since years towards the progress of the company. This has contributed to the efficiency and overall growth of the company. Together we work as a team meticulously to build a spirit of loyalty, quality and transparency.

WE CARE FOR DEALERS, THEIR CUSTOMERS AND IT SHOWS

We use promotional products to market your dealership and provide a memorable experience to your customers with an exceptional ROI. Our array of promotional products help create awareness for your business or the marketing campaign you are running. They can act as value-added gifts to enhance your customer's experience and lure new, prospective buyers.

ULTIMATE SHOWER *Experience*

With the customer at the heart of everything we do, our industry-leading technology and award-winning designs has resulted in beautiful, easy to install and user friendly showering solutions.

EXPANDABLE *Possibilities*

Instant flow with no delay. The Xen valve will give you the most luxurious showering experience. Fulfill your bathroom dreams and choose the style that is built for you.

BEHIND THE *Technology*

Our new Xen technology has been carefully designed and manufactured with the installer in mind. The Xen easy-fit box offers many benefits, including 3/4" inlets for high flow and a built in spirit level for precise installation.

HOW *Xen* IS DIFFERENT FROM OTHER BRANDS?

QUARTER TURN

1. LONG LASTING INTERNAL FITTING ASSEMBLY

Conventional but Half Turn

- Both spindle & bonnet made of finest extruded brass rod.
- Rising type . Less number of working parts than conventional one. Hence, less chances of wear & tear, easy to maintain/replace/repair.
- Multiple transmission thread for maximum lift with minimum turn (180 +/- 20 degree turn) result is 3 mm standard lift of valve to release sufficient quantity of water.
- Anti – slip transmission thread.
- Transmission thread area (actual working area) duly lubricated with high grade engineering lubricants (silicon).
- Transmission area remains protected with "O" ring against lubrication wash-off, debris or suspended particles in water hence longevity of transmission thread is ensured.

Ceramic Disc Cartridge

- It is washerless, hence there is no issue of eventual wear & tear.
- This type of cartridge offers higher endurance & very low maintenance in the long run.
- Minimum rotation of only 90 degrees required for full flow of water.
- This cartridge is made entirely of brass.

Single Lever Cartridge

- Multi Function cartridge, mixing of hot & cold water and the flow of water can be controlled by a single lever.
- Cartridge is made of high quality ceramic disc, hence it is washer free.
- Since the cartridge is washerless, the fitting offers high endurance & low maintenance over prolonged periods of time.

CONVENTIONAL

2. SOLID BRASS CONSTRUCTION

- Made of highest grade brass (copper contents 58% or more).
- All of the Components assembled in final products except petty items like screw, etc. are made of brass only. No components so far, has been introduced in zinc by us.
- Made of die-cast brass (Grade DCB II as per IS) with gravity die casting procedure.

3. WATER PRESSURE SUSTAINABILITY

Appropriate & uniform wall thickness all over the body to sustain water pressure of up to 10 kgf/sq.cm.

4. STREAMLINED / AERATED FLOW

Sieve/aerator : Appropriate water straightening device i.e. sieve/aerator provided for water saving as well as anti-splash feature.

5. DURABLE EXTERNAL FINISH

Chromium Plating:

- Three layer chromium plating i.e. Copper, Nickel & chromium
- Before nickel plating each piece passes through a Copper bath (now eliminated by most of the manufacturers for taking higher production) for added luster and proper electric conductivity resulting in better adhesion of nickel & chromium on the exterior of body.
- Appropriate thickness of Nickel (10 to 25 microns) and Chromium (0.3 to 0.5 microns) for enhanced luster and enhanced life of outer surface.
- State of the art Electroplating plant.

6. EASY OPERABLE

Handle: Ergonomically designed handles/ knobs for better & anti-slip grip.

Appropriate sizing & punching of knurling for better fitment of handle/knob on internal fitting assembly.

7. UNBREAKABLE THREAD

14mm of inner diameter maintained at inlet thread to give an appropriate wall thickness in this main load area at the time of installation. Hence chances of thread breakage are almost eliminated.

8. SYNTHETIC RUBBER PARTS

Rubber parts

All rubber parts are made of synthetic rubber for better life & sealant.

9. LEAK PROOF

Double rubber sealants:

- For protection of transmission thread from dirt, particles, salt, iron or other impurities in water for enhanced life of the valve.
- For protection of lubrication agent applied on transmission thread from getting washed away with water for easy & smooth, maneuvering always & enhance life of the transmission thread.

10. ENHANCED LIFE

- Anti-rotation mechanism in valve resulting in enhanced life of seat washer as the same is being protected against getting damaged from roughage on seat.
- Endurance test done for 30000/100000 cycles * randomly.

11. APPROPRIATE SIZING

Appropriate sizing & provision of stopper in sieve / aerator fitting area, avoiding it to slip inside the tap or to slip out with pressure of water.

*Depending on models

CARE AND INSTALLATIONS

Xen constantly strives to interact with consumers and make its products consumer friendly. The company's trained staff and executive maintain a direct interface with consumers, educating them about the product quality, convenience and maintenance. Xen also believes that consumers must get the best out of its products. Hence it has evolved a set of consumer guidelines, which if followed ensure optimum and trouble free performance with enhanced durability of Xen products of years to come. The guidelines are:

DURING INSTALLATION

- Use 25mm pipeline instead of 20mm to ensure better flow of water. Lay the pipelines straight and vertical as far as possible.
- More than required number of bends throttle the pressure of water. Keep the number of bends in the pipelines to a minimum. All the supply lines must have vent pipes which helps in giving a smooth flow of water from the fittings.
- Center to center distance of pipe fitting for Hot & Cold inlet for all types of wall mounted mixtures should be maintained at 165mm by which any of our wall mixers can be easily installed without any problem.
- Place the outlet point in the overhead tank at least 2.5cm above the ground level of the tank. This prevents the flow of foreign particles, sand, etc. along with water supply into the fittings avoiding the possible damage to the working parts.

POST INSTALLATION

- Cover the taps with poly pack before or after their installation till they are put to actual use to protect the fine finish of fittings from dirt, stains and other damages.
- Do not use harsh cleaning agents containing abrasives and acids. Instead use of soft sponge or wet cloth with soapy water / diluted vinegar to protect the colour finish.
- Clean the aerators provided in the items at regular intervals for a perfect flow of water from the fittings. To clean the aerator, remove it, knock out the silver insert and rinse through with water.
- Clean the overhead tank thoroughly before the supply starts. It is suggested that the overhead tank must be cleaned at regular intervals to avoid deposition of foreign particles. To avoid any foreign material to pass through the taps use jali.
- Avoid leakage of water from taps.
- Turn the tap off when not in use especially when you brush your teeth or wash clothes.
- Check the leakage of water in the toilets. Also get check the hidden water leaks.
- Never throw the water unnecessary on roads which can be used for gardening and cleaning.
- Avoid unnecessary flushing the toilets. Use minimum amount of water to bath.
- Water your lawn only when it is needed.
- Do not leave the tap running while washing the dishes in the kitchen.
- Install small shower heads to reduce the flow of water.

Terms & Conditions E. & O. E.

1. Rate are for Delhi.
2. All Payment to be clear with in 45days from the billing date. Interest @ 24% p.a. will be charged on all over due a/c.

4. Subject to Delhi Jurisdiction only.
5. Our responsibility is upto the delivery of goods at TPT Delhi Office. Any loss in transportation will be borne by the Purchaser.
6. This price list superseads our all previous price lists.

“MIY” MAINTAIN IT YOURSELF

One of the major problems that the households face is the maintenance of taps. Even for a small problem you need to call a plumber and you end up feeling that the taps you purchase are too costly. But the problem will persist even with the leading brands because the water will always have dissolved particles in it and it will always clog the aerator resulting in low flow of water. XEN, a leading brand in quality taps brings you the solution. Along with technologically advanced, intelligent designs, value for money and 7 years warranty XEN brings to you "Maintain it yourself (MIY)" taps. Let's learn how!

LEARN HOW TO CLEAN A TAP

To keep the exterior finish of our product i.e. Chromium Plated / Coloured Surface shining for years, clean it with the help of mild soap & water. Do not use abrasive sponge or scouring agents for cleaning.

We also advise you not to use cleaning agents containing solvent or acid, lime scale removers, household vinegar and cleaning agents with acetic acid in them.

Clean Taps with a little soap and moist cloth only, then simply rinse off and wipe dry. You can avoid lime spots (White Spots) by drying the fitting each time it is used. After drying you can apply a coat of wax polish to protect the surface from settlement of water for a considerable period of time.

LEARN HOW TO CLEAN THE AERATOR

Because of the dust, minerals and suspended particles, that comes with the water the aerator gets clogged, resulting in low flow of water. The solution is not to remove the aerator but to clean it as it helps you get streamlined and anti-splash flow of water with reduced consumption of water as well.

To clean the aerator first open the housing by unscrewing it clockwise. take out the aerator.

Wash it with water, clean it and simply attach it again. Here you go steady high flow of water. Surely you save a few bucks here.

LEARN HOW TO SOLVE THE DRIPPING TAP

Another problem that you face with the tap is the issue of dripping tap.

This issue can be solved by cleaning the internal fittings and you would be happy to know that you don't need to call the plumber again.

Firstly open the ABS cap hiding the allen Screw on the tap handle.

Use the allen key (Provided with Every Box) to open allen Screw inside and remove the tap handle.

Once you remove the tap handle you will find the ceramic disc cartridge. Unscrew it with the help of a spanner by turning it anti- clockwise.

Now remove the rubber washer at the bottom of the cartridge.

Remove the two ceramic discs inside and clean it. Apply little grease on the shiny surface of both the disc.

Now put the ceramic discs and rubber washer back to its place and fit the handle back on the tap.

Here you go --- drip free tap.

So next time when you purchase a tap don't look for a cheap option, instead go for the one which gives you value for money and peace of mind.

Complaint Resolution

Less Waterflow From Aerator

CLEAN THE AERATOR IN 3 SIMPLE STEPS

1. Open the permix by moving anti clockwise
2. Clean the garbage collected & back flush with high prerssure water
3. Tight back the permix with areator

Dealer is unable to address the complaint

Contact at Company Toll free number or WA number

Plumber don't know the correct way to fix the faucet

Visist our you tube channel or send request at WA, and you will get explainer video

Loose Knob

Open the plastic button provided on the back side of the knob and tighten the LN screw with 2.5mm LN Key

Call not picked up at customer care number

REASON MAY BE YOUR ARE CALLING DURING OFF HOURS , IN THAT CASE

1. Make a small video of your concern with voice explanation
2. Send to WA number - 9313280552 & share your contact details
3. Our CRM team will connect you

PRODUCT	WARRANTY PERIOD

PROTECT YOUR PRODUCT FROM :

- Water Scaling :** Due to presence of minerals and salt in water, scaling is formed on the product if it is not cleaned regularly. The products should be cleaned gently at regular intervals. Also take extra care to clean the edges and corners of the products because these areas are more vulnerable for scale setting. Clean the aerators from time to time for a perfect foam flow of water from the fittings. The property of water being used is very important for your plumbing installations (Pipes etc.) as well as your own hygiene. The hardness of water should not exceed 300-400 p.p.m.
- Acid fumes :** When we clean the tiles or floors in the bathroom with cleaning agents which contain acids or chemicals, acid fumes are formed because the basic material used in the products resulting in damage to the outer finish or coating.
- Scratching while cleaning :** Scratching or scrubbing occurs due to hard nature of cloth or coarse cleaning powder being used for cleaning. Use a gently fluffy soft cloth for cleaning the surface.
- Atmospheric Condition :** This condition applies mostly to salt content in the air in coastal areas, sometime the are reacts with brass and black spots emerge on the surface or product. Therefore the product is required to be cleaned regularly. At the time of installation of these products. Cover the products with the cloth covers provided in packaging or with polythene till the time you start using.
